## **Mobile Solutions Brings 2021 Product Line to SEMA**

*Company to showcase precision tools for panel building and functionality*

**TEMPE, ARIZ., October 29, 2021 (MEDIAWIRE)** – Mobile Solutions® will fulfill its 16th year of exhibiting and teaching at the 2021 SEMA show, scheduled for November 2-5, 2021 at the Las Vegas Convention Center in Las Vegas. The company will present its products at Booth No. 12445 in the Mobile Electronics & Technology section of the North Hall. Bryan Schmitt, president and head instructor, will be on hand to greet attendees and demonstrate the company's products.

Among the products to be highlighted at the show, the Arc Guide Template system allows fabricators to add stylish touches to wood surfaces. The 11-piece kit comprises arcs with a radius of 20 to 36 inches alongside straight pieces of three lengths.

Also featured is the new Magnet Fitment System, which enables quick, easy and secure flush-mounting of magnets to secure speaker grilles or panels. The kit includes four sizes of Magnet Match™ countersink bits to create perfect, flat holes at the proper depth. Smart Mag Alignment Plates™ ensure each magnet is inserted with precision.

The new GT Template system adds another series of fabrication shaping guides to the Mobile Solutions ecosystem. Nine template pieces—including four pieces that can be used separately or as part of the largest template ring—give fabricators expanded creative flexibility when building pressed grilles or close-contact panels.

In addition to the booth presence, Mobile Solutions' Bryan Schmitt will headline a seminar as part of the annual SEMA Education series. Titled, "Seamless Visual Integration of Modern Electronics into Vehicles," the session will focus on upgrading classic and custom vehicles with the latest technology while retaining the vehicles' original style and design flow. The session takes place in Room N257 at 1:00PM PT on Tuesday, Nov. 2. Gary Bell, accomplished vehicle designer and owner of Define Concepts in Orange, Calif., will moderate the seminar.

"In this uncertain climate, we recognize companies made the decision to attend or not attend SEMA based on factors that are unique and internal for each company," said Schmitt. "We made the decision to continue our attendance at SEMA based on our own factors and look forward to seeing new and existing customers while participating in the safety measures implemented throughout the show."
