ORCA / MasterTech Fall Training Set for October 13

In-depth course to train technicians on full features of premium vehicle tuning solution

CAMARILLO, CALIF., September 8, 2023 (MEDIAWIRE) – ORCA Design and Manufacturing announced the dates for its fall training and fabrication session, to be held at and instructed with Mobile Solutions in Tempe, Ariz. Select industry installation and fabrication professionals will undergo four days of intense training from October 13 through October 16.

Instruction will consist of the highly rated MasterTech training program taught by Mobile Solutions, in addition to product-specific training led by Orca’s training team. This session will center on the Gladen GA-BARNIE vehicle audio tuning system, which accurately simulates human listening to tailor the sound for drivers and passengers.

“We value our ongoing relationship with Mobile Solutions,” said Nalaka Adikari, national sales director for Orca. “Over the years we have seen the improvement of our retailers – in representing our product lines and enhancing the quality and creativity of their builds – as a result of the training they receive in our special sessions. DSP has become a vital component of car audio customization. With the dedicated GA-BARNIE training segment, we ensure our installation professionals master one of the most innovative tools for enhancing the in-vehicle audio experience.”

GA-BARNIE is currently available to Orca retailers. For more information on the upcoming training session, please contact your local authorized Orca representative. For more on the GA-BARNIE vehicle audio tuning system, please visit mosconi-america.com.

About Orca Design and Manufacturing

Based in Southern California, Orca acts as importer/distributor, designer and manufacturer for a variety of notable brands. We are the sole U.S. distributor for Focal mobile audio, and import speakers by Gladen Audio of Germany and Italian-made Mosconi amplifiers. In addition, we design quality products under the Illusion Audio brand, and offer Blackhole damping materials and Raven pure ribbon tweeters for home and mobile installations alike. For more information, visit our website at orcadesign.com.
